Alarcon Chavez, Jhoane Marijes

Albarran Magallanes, Jazmin Giuliana

Caballero Corzo, Leydi Del Rocio

Estefanero Palacios, Jireh Janeth

Galiano Mantilla, Nazareth Paz

Vega Quesñay, Amira Alejandra

**Nuevo Chimbote, 2025**

## PRESENTATION

Good morning Mr. Cabanillas and the jury present. My name's Jhoane Alarcon and I'm the team leader and my classmates are Albarran Jazmin, Caballero Leydi, Estefanero Jireh, Galiano Nazareth and Vega Amira.

## INTRODUCTION

Today we are going to present our project work. Its name's "My life project", it's about our life plans. The objective of this work is to map out a purposeful life path by setting clear personal and professional goals that help us grow, make better decisions, and reflect who we are, our talents, and what we dream for the future.

### *JAZMIN'S LIFE PROJECT*

**In the short term:**

This year, I am going to move abroad and enter a language academy to strengthen my English. During that time, I am going to get a job to earn and save money because I want to buy a good car, so I can easily move anywhere I need to go. Eventually, I am going to prepare academically to apply to the Virginia-Maryland College for Veterinary Medicine.

**In the long term:**

After my career and having experience, I will probably work in some Animal Protection Organization such as shelters or rescue centers, which has always been my dream since I was a child. After that, at some point in my life I would like to specialize in arts, such as entering workshops to expand knowledge and improve my techniques so that I can independently produce my works of art in painting and sculpture. In the process I will get married and have children and obviously I am going to buy my own house to live with my loved ones.

**NAZARETH'S LIFE PROJECT**

**Short - term**

This year, I am going to finish Cervello High School in the top position of excellence because I want to close this stage of my life feeling proud of my effort. Before graduating, in April, I am going to apply to University of the Pacific to study Economics, which has always been my dream. Next two years, I am going to finish learning English, and I'll probably speak it fluently, something that will open many doors for me. Achieving these goals will be challenging, but I am excited to take each step and see everything fall into place.

**Long-term**

By my third year at university, I will probably win a scholarship to study in another country, which will be an incredible opportunity to learn and grow. Once I finish my degree, I am going to continue studying; first with a diploma, then a master's, and eventually a doctorate in Law, because I want to explore different fields and become the best version of myself. I also dream of studying a second career in Languages, as I have always loved learning about different cultures and communication. After that, I will probably work in a multinational company or the Ministry of Economy and Finance, where I can make a real impact. I imagine myself leading projects that help Peru grow sustainably while also inspiring others to follow their dreams. It is a long journey, but I believe it will probably be worth every step.

***AMIRA'S LIFE PROJECT***

**Short - term**

I have a lot of short-term goals. One of them is that this month I am going to finish my basic in English and I am going to continue with the next level. The month of March is special for me, because my sister will take her admission exam and it's also the month of my birthday. The day of my birthday it's March 26 and I'm going to celebrate with my family and friends at a nice restaurant. Also, in April I'm going to begin the fifth cycle of the education degree, so there will be a celebration. They are short steps that go a long way.

**Long-term**

In the future, I'm going to finish my degree in education, do my master's and doctorate. Also, I'm going to get certified in the Italian, Korean and Quechua language because I'm going to travel to different countries and cities. In addition, I am going to study other courses so I can start a second career that has the option to get a degree abroad. Finally, I'm going to buy a car and the house of my dreams in the middle of a forest, get married when I'm 35 years old and start my family.

***LEYDI'S LIFE PROJECT***

**Short - term**

This year I am going to continue with my English classes at the intermediate level. During that time I will organize my career ceremony with the help of my colleagues. The director, teachers, friends and family of each classmate will be invited. Eventually I will study the Quechua language and work harder to obtain a scholarship.

**Long - term**

After my degree and gaining experience, I am going to work in the mountains of Peru because those places are very peaceful, and the people, especially the children, are wonderful. Afterwards, I will continue specializing in my career. During the process, I will get married, have children, and buy a big house where I can live with my loved ones.

***JIREH'S LIFE PROJECT***

**Short - term**

I am going to stay in Peru and continue my studies in Systems Engineering at UNS. While studying, I am going to work part-time, I am going to find a job that is not too exhausting so I can balance my time efficiently. I am going to save money to buy essential things, including my own PC, which is going to help me both in my studies and creative pursuits.

**Long - term**

I am going to study animation and drawing to develop my skills and work towards becoming a recognized artist. Additionally, I am going to explore other artistic fields, such as music, to expand my creative expression.

I am going to focus on building the life I want. I am going to live in Chimbote, in a peaceful and safe neighborhood, where I am going to dedicate myself to my artistic and professional goals. Step by step, I am going to achieve my dreams while staying true to my passions.

***JHOANE'S LIFE PROJECT***

**Short - term**

This year I am going to start studying to apply for another career. I'm also going to save money to use later, that's why I'm going to get a job and earn money. I have to continue my English studies and then practice with other native speakers online. I'm also going to open an online clothing store for a while just to make some extra money. On top of all this, I'm obviously going to finish my degree.

**Long . term**

After finishing my degree, I think about studying veterinary medicine. I'm going to save my incomes to travel to another city and maybe work there. I also plan to travel to other countries and visit many historical places and of course I will work in the profession that I initially studied. I also plan to help homeless animals and give them another chance at life.

## CONCLUSION

Each of our classmates set their personal goals, for example, Jazmin will travel abroad and study English or Nazareth will finish in the excellence category. Additionally, we set professional goals, like Amira and I, to pursue a master's degree after finishing our degree. And finally we reflect our talents and dreams, like Jireh with artistic passion and Jhoane with helping animals.
